Hardware compatibility

**Aim :** To change Hardware compatibility of a VM using VMware workstation PRO.

Procedure :

→ Power off the virtual machine.

→ In the vmware workstation PRO Library view, right-click the virtual machine and select "setting".

→ In the virtual machine settings dialogue box select the "Hardware" tab.

→ To change the number of processors or cores, select "processors" and change the value as desired.

→ To change the amount of memory, select "memory" and change the values as desired.

→ To change the virtual hardware version, select "options" and then select "General". Here you can select a new virtual hardware version is available.

→ Click 'ok' to save the changes.

→ Power on the virtual machine.

output :

Daivala Thanusri

V Device

memory : 16 GB

Processor : 8

Hardware Disk : 1GB.

Hard Disk : 2GB

network Adapter : NAT

memory : 16GB

Processor : 8

Hardware Disk
: 4GB

virtual machine details

State : Powered off

configuration file :

Hard ware compatibility :
work station-17 x virtual.

Primary ip address.

Result :

Using vm ware work station pro, we
successfully changed the hard ware
compatibility of a created virtual
machine.

Windows 10 x64 - VMware Workstation
